

# From Data to Situational Awareness

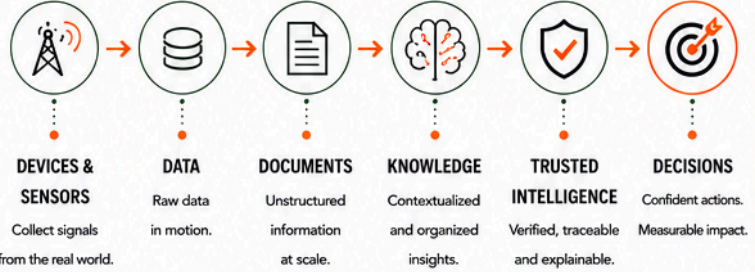

## The Enterprise Intelligence Layer

FROM DATA TO DECISIONS. FROM COMPLEXITY TO CLARITY.

THE JOURNEY: FROM DATA TO DECISION

AiBEN Compass enables organizations to move beyond information retrieval and toward operational intelligence — helping decision-makers understand what is happening, why it matters, and what actions should be considered next.

Designed for critical environments including ports, logistics, defense, infrastructure, insurance, engineering, public sector, healthcare, and industrial operations, Compass combines sovereign AI, edge computing, and traceable intelligence into a single platform.

Enterprise Intelligence Architecture provides structure and integration. AiBEN Compass provides speed, trust, and context.

Together, they turn complexity into a strategic advantage.

**ZERO HALLUCINATION AI**  
No guessing. Only verified answers.

**FULL TRACEABILITY**  
Every answer linked to source evidence.

**EDGE AI**  
Run anywhere. On-premise. Fully under your control.

**BUILT FOR TRUST. DESIGNED FOR IMPACT.**  
Secure. Private. Enterprise-ready.

### 1. FRAGMENTED SYSTEMS & DATA

### 2. CONNECTED ENTERPRISE ARCHITECTURE

### 3. TRUSTED INTELLIGENCE & DECISION

#### WHY IT MATTERS

- Unifies data, systems, and knowledge across the enterprise.
- Ensures governance, security, and regulatory compliance.
- Optimizes operations and accelerates decision-making.
- Enhances customer, citizen, and partner experiences.
- Drives performance, resilience, and business impact.

#### AIBEN COMPASS SOLUTIONS

**TENDERLENS**  
Tender intelligence, translation, extraction and opportunity review.

**PORTAI**  
Port document automation and operational workflows.

**PORTRADAR**  
Real-time maritime and logistics situational awareness.

**EDGE AI**  
Local and sovereign AI deployments for critical environments.

**COMPASS**  
Enterprise-wide intelligence and decision support.

#### EDGE AI POWERED INTELLIGENCE

- Process data locally at the edge
- Operate offline or with low connectivity
- Enhance security and data sovereignty
- Reduce latency and improve resilience
- Enable real-time decisions at the source

FROM DATA TO DECISIONS. WITH TRUST IN EVERY STEP.

AiBEN Compass transforms diverse data into trusted intelligence that powers confident, faster, and better decisions.

#### BOTTOM LINE

- Are our data and systems connected or still fragmented?
- Do our interactions drive decisions or create more work?
- Do we have the architecture, governance, and intelligence to lead the future?
